Art Unit: 3676

1. Figures 1A and 1B should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The disclosure is objected to because of the following:

It appears that one or more pages of specification are missing insofar as the last page of the specification present, i.e., page 20, ends with incomplete text.

Appropriate correction is required.

3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o).

No antecedent basis can be found in the specification wherein the reactive partitioning chemical in the first and second carrier fluid may comprise "a soluble polymer", instead of the disclosed organic esters, as called for in claim 4. In addition, in such embodiment wherein the reactive partitioning chemical comprises a polymer, it is further not clear or disclosed what would then comprise the "gel or polymer progenitor fluid".

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 19, it is not clear whether the recitation "said reactive partitioning chemical" refers to the first carrier fluid or the second carrier fluid previously set forth in the claim.

Claims 2-7 are deemed indefinite insofar as they depend from claim 1.

Claim 3 is deemed further indefinite in being drawn to an improper Markush grouping. As noted in MPEP Section 2173.05(h), the only acceptable transitional phrases in setting forth a Markush grouping are -- is selected from the group consisting of -- or -- is --. Accordingly, the term "including" in line 3 should be amended to, e.g., -- selected from the group consisting of --.

Claim 5 recites the limitation "the wellbore tubular volume" in lines 1 and 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 7 is further deemed objectionable/incomplete insofar as it fails to comprise a complete sentence, i.e., the claim does not end in a period (.).

Claim 8 is deemed incomplete, and therefore indefinite, insofar as the terms "R1" and "R2" have not been defined.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited references disclose processes of forming blocking gels or polymer filters in a subterranean formation by sequential injection of reactive fluids and/or consolidation or

Art Unit: 3676

subterranean zone plugging processes wherein one or more of the reactants or components comprise a partitioning chemical, such as Hilton, Jr. (Re 25,747), Methven et al (3,428,122) or Friedman (3,749,174).

7. Claims 1-8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
